CATERING AND HOSPITALITY TABLEWARE

Regardless of where people gather to eat, be it the dining hall, canteen, care home or nursery, ORNAMIN tableware wins people over with its many benefits. It's the combination of design, quality and sustainability, in particular, that sets it apart from competitors' products. The solid, thick walls and brilliant surfaces give it a top-quality appearance.

TABLEWARE FOR CATERING AND HOSPITALITY.

MORE THAN 60 YEARS OF EXPERIENCE

Whether it's adults or children, any time several people gather around a table, the constant noise can sometimes be quite irritating. ORNAMIN tableware is **pleasantly quiet**, which is good news to both the dining guests and the kitchen staff. It is also **especially light**, which is primarily noticeable when you are carrying a tray of several plates and bowls to your table. Two benefits, in particular, that are easy on the wallet are the **extreme sturdiness** and the **energy-saving** material.

The average breakage rate of melamine tableware is just **2 %** (in comparison the average breakage rate of porcelain is **33 %**). Fewer breaks means **long durability** and **less need for replacements**, whilst the low thermal capacity ensures that food stays warm for longer without preheating and less energy is required for cleaning. What's more, the weight tolerances of melamine tableware are much lower than those of porcelain, so that the **tare weight is always right** with ORNAMIN. And, finally, there is the issue of eco-friendliness. Due to the materials used, the tableware is fully recyclable. And ORNAMIN offers a **warranty** on manufacturing defects, provided the care instructions have been followed (normal signs of tear and wear excluded).

By the way: Tableware made of melamine is perfectly suitable for decorations. You can either choose from the wide range of designs offered by ORNAMIN or create a **customised design** (see page 17).

*ORNAMIN offers a 30-year warranty against manufacturing defects. Only if the directions for use and care instructions are followed. This warranty does not cover normal wear and tear.

**On request the ORNAMIN tableware can be equipped with RFID technology.

SAVING POWER MEANS SAVING COSTS AND THE ENVIRONMENT

Less power consumption in the dishwasher.

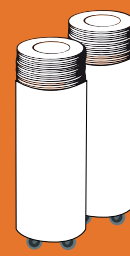

Dishes do not have to be preheated.

**LESS WEIGHT AND
LESS NOISE PRODUCTION**
Relief for kitchen staff and guests.

**STURDY AND
DURABLE**
Less shards mean
less need for
replacements.

OUR TARE IS CORRECT
Low weight tolerances.

SERIES 100: COUNTRY STYLE TABLEWARE .

TIMELESS DESIGN

The Country Style series offers a timeless design for canteens, cafeterias, schools, day care centres, nursing homes, hospitals, hotels and to the catering industry - and of course also for the private use at home or on the go.

The plate is characterized by a wide rim which is clearly separated from the comparatively small inner surface of the plate. Both the rim and the inner surface of the dish are suited for decorations from the assortment of ORNAMIN or you can have individually designed decorations. The plates are perfectly stackable due to their shape, the same applies also to the mugs and bowls.

SERIES 400: PURISTIC STYLE TABLEWARE .

THE LIGHTNESS OF BEING

The Puristic Style series distinguishes itself by its lightness and its soft, rounded shapes.

There is a smooth transition between the rim and inner surface of the plate. Like all tableware series by ORNAMIN the Puristic Style tableware is due to the material properties ideal for use in canteens, cafeterias, schools, day care centers, nursing homes and hospitals, and also for use at home or on the go. The plates are perfectly stackable due to their shape, the same applies to the bowls.

SERIES 500: CLASSIC STYLE TABLEWARE.

THE CLASSIC SERIES FOR CATERING

The Classic Style series by ORNAMIN offers a stylish solution for canteens, cafeterias, schools, day care centres, nursing homes and hospitals.

The plates are characterized by a narrow rim which clearly separates the large inner surface of the plates. Both the rim and the inner surface of the plates are suited for decorations which can be chosen from the wide range offered by ORNAMIN or individually designed. The plates are perfectly stackable due to their shape, the same applies to the mugs and bowls.

SERIES 600: CAMPUS STYLE TABLEWARE

MODERN TABLEWARE

Simple and timeless, this unusual Campus Style series presents with a harmonious combination of angular and rounded elements.

In addition, the special shape ensures a space-saving storage and efficient cleaning. Both the rim and the inner surface of the plates are suited for decorations which can be chosen from the wide range offered by ORNAMIN or individually designed. The plates are perfectly stackable due to their shape, the same applies to the cups and bowls.

PROJECT REFERENCE

The Campus Style series was developed for the new canteen of the university Göttingen (Germany) and then adopted into the range by ORNAMIN.

AWARD WINNING

Modern design meets sustainable material: The broad rim of the plate in combination with the smooth transition to the inner surface provides for an elegant appearance. The noble white of the tableware underlines this impression. The rim of the plates is suited for decorations which can be chosen from the wide range offered by ORNAMIN or individually designed. All in all this tableware series combines aesthetic, economic and environmental aspects in a classy way.

BOWLS

Soups, sides, stews, cereals, salad ... - there are not only a lot of dishes and meals but also a lot of various situations, demands and tastes. Therefore ORNAMIN offers a product range with wide choice. Choose specific stackable bowls for the canteen kitchen - and decide on options between round and angled, small and big, flat and high, white and colourful alternatives. The wide volume range allows you to find the exact bowl for your demand. The measures are adapted to the needs of common feeding.

COFFEE TO GO

Hundreds of thousands of disposable cups are bought per hour which amounts up to billions of cups that are thrown away in the bin per year. For coffee enjoyment without burdening the environment ORNAMIN offers reusable solutions! The cups as well as the lid and sleeve are durable – while the disposable alternative lasts for about 15 minutes on average.

The cups made of break-resistant quality plastic are light, sturdy, break-resistant and have an appealing look and feel. The perfect supplement is the spill proof Drinking Lid which is easy to open and close and fits tightly for safe transport. For a better grip a Non-Slip Sleeve is available. On request we produce the cups, lids and sleeves in your preferred colours and designs.

Snack to go:

The to-go cups can also be used for snacks, e.g. fruit salads or yoghurt with granola.

FOOD TO GO BOWLS

Lunch for take away to the office, a salad to go for an outdoor picnic or yoghurt with cereals and fruits for the morning break: Food to go is not only practical but also environmentally friendly and sustainable and represents an urban lifestyle. The meal will be prepared at home, filled in a to go bowl or to go cup and locked securely for take away. Later it can easily be warmed up in the microwave. Instead of buying lunch packed up in disposable boxes from the supermarket, the bakery or the canteen, the meal can directly be filled in reusable boxes for take away at the counter.

In addition to its reusable to-go cups ORNAMIN also offers reusable to-go bowls. Made of break-resistant high quality plastic they are light and sturdy and have an appealing look and feel. The spill-proof lid fits tightly for safe transport. It is also possible to equip the bowls and the lid with RFID technology to make payment and return processes easier.

The puristic design of the bowls is perfect for dishwasher safe decoration, e.g. customised brandings. On request the bowls, cups and lids are also available in your colour of choice starting from small order quantities.

PROJEKT REFERENCE: ECOBOX LUXEMBOURG

„At SuperDrecksKëscht we especially deal with the complete consideration of processes for waste avoidance in order to not live at the expense of the environment and future generations. Within our project Eco-Box, particularly the entirety of the process evaluation convinced us of Ornamin. The complete product life cycle of the Eco-Box is represented at Ornamin – from the product development to the production and recycling. The quality of the Ornamin articles and the existing know-how in the field of articles with food contact is what convinced us.“

FOR LITTLE HEROES

For little heroes with big appetites: The child-friendly crockery 'For little heroes' by ORNAMIN makes every mealtime big fun for all kids. It is made of practically unbreakable melamine that can withstand almost anything. The bowl and plates come with two colourful non-slip grip pads each, while a colourful non-slip sleeve is provided for the cup. This ensures that every piece is easy to pick up, even for the smallest, clumsiest hands. Additionally a non-slip ring under the base guarantees a firm stand.

All in all, the children's tableware 'For little heroes' by ORNAMIN encourages children to eat and drink independently as its size, weight and features are adjusted to the motor skills and power of children.

KEEP WARM DISH

The Keep Warm Plate and the Keep Warm Bowl enable even the slowest eater to enjoy their meal to the very last bite. Non-slip grip pads not only ensure a safe hold, but are also a great way to conceal the openings for the thermal function. The big openings are easy to fill with hot or cold water or crushed ice. A non-slip ring under the base ensures that nothing slides around when you are eating.

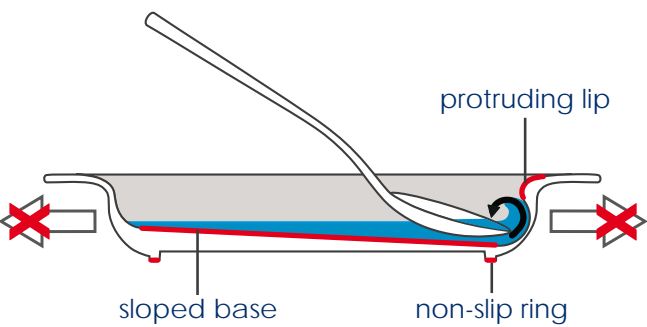

Thirsty during bed time?
The Thermo Mug Firefly glows in the dark after a short exposure to light and is easy to find on the bedside table.

PLATE WITH SLOPED BASE

Eating made easy: The Plate with Sloped Base helps children to learn eating independently. The interior base is not flat, but rather slopes towards the edge of the plate. Together with a discreet protruding lip, the food slides towards the fork or spoon as if by magic whether tomato soup on the plate or vanilla pudding in the bowl. A non-slip ring also guarantees a firm stand.

TABLEWARE WITH SUPPORTING FEATURES.

SMART DESIGN BRINGS EVERYONE TO THE TABLE

Eating together is an important social event and one of life's simple daily pleasures – provided everyone can participate and enjoy their food. The award-winning family tableware by ORNAMIN has been designed with style as well as function, removing any stigma or embarrassment about using adaptive crockery because its supportive features are hidden in its design. Additionally, the smart ideas are combined with great materials which make the tableware e.g. extremely light and very sturdy.

These smart ideas make life simpler and encourage independence:

EATING AND DRINKING WITH DEMENTIA.

THE RED RANGE

Eating and drinking habits often change in those affected by dementia: they have less hunger and thirst and no longer understand the need to eat or drink. The functional tableware by ORNAMIN is based on one main principle: eating is a visual process too. Clear shapes and contrasting colours help to make eating and drinking simpler and easier to do. **Our tip:** Red is the colour of dementia because it has a positive effect on the appetite, provides orientation and is a colour that those suffering from dementia can still recognise even in the advanced stages and it makes contrasts in colour easy to see.

The plates, bowls, cups and boards are also characterised by their intuitive handling. The supportive features hidden in the design make everyday challenges easier to overcome. This promotes independence and a feeling of self-esteem. And: **something that is practised everyday is harder to forget.**

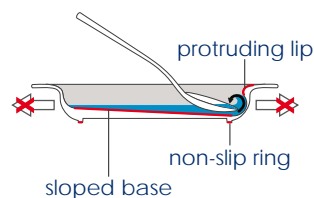

For more information go to www.ornamin.co.uk.

Clear shapes and contrasting colours give orientation.

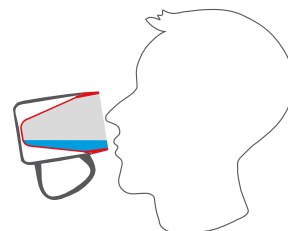

PLATE WITH SLOPED BASE:

- makes eating easier due to:
 - a sloped base
 - a discreet protruding lip
 - a non-slip ring on the bottom
- available in three sizes

MUGS WITH INTERNAL CONE:

- make drinking easier due to the cone-shaped interior
- handles allow secure hold
- thermal function keeps drinks warm or cold as required
- intuitive use
- available in three designs

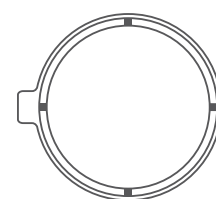

DRINKING LID 813

- inconspicuous drinking lid
- sits discreetly inside the cup
- intuitiv use: drinking from all sides is possible
- prevents splashes and spills
